

Build a Platformer in 10 Steps

Every game you love was made exactly like this.

1

Get your art

Grab the sprites · make pixels crisp
(Filter → Nearest)

2

Make your tiles

TileMapLayer + your tile picture =
building blocks

3

Paint your level

Draw floors & platforms like a
coloring book

4

Build the Player

Body + picture + bump-shape +
camera — the family of 4

5

Load her poses

The sprite sheet = all her moves in
one picture

6

Teach the keys

left · right · jump — spelled exactly

7

Brain 1: walk & fall

Arrows move her · gravity pulls her
down

8

Brain 2: jump

Space + on the floor · remember:
negative = UP!

9

Brain 3: smooth moves

Speed up slowly, glide to a stop —
the pro feel

10

Animate + press GO!

Idle, run, jump, fall — then ► and
CHEER 🎉

Parts Stage Settings Files GO ►

Break it → Undo → try again. That's how game makers work.
