

Reef Runner — What to Say

Your line for each of the 20 slides. You lead by pointing at colours.

■ Parts ■ Stage ■ Settings ■ Files ■ GO

1 TITLE

"**Today we make a real video game.** By the end, you'll have a character YOU made that moves when you press the keys."

Do → Big energy. Let it land.

2 TODAY'S WIN

"Here's the goal — not the whole game. Just this: **she walks, and she jumps.** That's a real game moment."

Do → Keep the goal small on purpose.

3 THE MAP

"Godot looks scary, but it's really just **four areas that never move.** We give each one a colour."

Do → Point at the real Godot screen as you go.

4 AREA 1

"**Green is your Parts list.** Every piece of your game lives here, stacked like Lego. Top-left."

5 AREA 2

"**Blue is the Stage.** The big middle window where you SEE your game."

6 AREA 3

"**Coral is Settings.** Click any piece and its knobs show up on the right."

7 AREA 4

"**Purple is your Files.** Every picture and sound lives here, bottom-left."

8 THE BUTTON

"**Gold is the GO button,** top-right. Press it to play for real."

Do → Ask: "What colour is the GO button?" Repeat the 5 colours together.

9 4 WORDS

"Four words all week: **Node** = a piece · **Scene** = pieces joined · **Inspector** = knobs · **Script** = the brain."

10 7 STEPS

"We build in **7 tiny steps.** One at a time — and we tick each one off."

11 STEP 1

"**Open Godot.** Two ways: a brand-new project, or open the one the camp gave us."

12 STEP 2

"**Make our character:** add a CharacterBody2D, name her Player. That's the body she lives in."

13 STEP 3

"Give her a **picture** (Sprite2D) and a **bump-shape** (CollisionShape2D). One to see, one to bump."

14 STEP 4

"**Teach the keys.** Spelling matters: move_left, move_right, jump — lowercase, underscore."

Do → Write the 3 names big where everyone can see.

15 STEP 5

"**Give her a brain** — a script. In plain words it says: fall, slide, jump, flip, move."

17 STEP 7

"**Press GO!** Pick Level. Arrows to walk, Space to jump."

Do → Let THEM press it. Stop everything and cheer the first jump. 🎉

19 YOU DID IT

"Everything else in the game is **just this again**: add a piece, give it a brain, press GO."

16 STEP 6

"**Give her ground** — or she falls forever! A Level with a floor to stand on."

18 WHEN IT BREAKS

"If it breaks — **that's normal, that's making games**. Three quick fixes: bump-shape, spelling, jump is negative."

20 CLOSING

"**You're a game maker now**. Go build the reef."

Do → Name one thing each girl did well.

If you only remember one thing: you don't teach Godot — you point at the 5 colours and let the girls do the clicking. Go slow on slides 3–8 (the map). That 10 minutes makes the whole rest easy.
